CLOUD BACKUP STANDARD

While it is widely acknowledged that backing up data is an operational imperative, many lack the know-how needed to independently handle the configurations for custom backup and recovery. With our Cloud Backup Standard solution, we give you the support you need to customize your backup the way you need to - we make anything possible.

FLEXIBILITY   **SUPPORT**   **PROTECTION**

Cloud Backup Standard is specifically designed to give customers the flexibility in how, when and where they protect their data. This service allows for Full OS restoration of bare-metal and virtual servers that are designated for protection. You get assistance with configuring backups and restorations, and the ability to customize recovery points and retention periods all with unlimited software licenses. It also includes direct integration with Microsoft Exchange.

ADVANTAGES OF LEVERAGING THIS SOLUTION:

- Customize recovery points & retention periods
- Assistance with configurations
- Includes unlimited software licenses
- Supports full OS restoration for bare metal and virtual servers
- Backup MySQL, MSSQL & Microsoft Exchange

To get your data replicated to a phoenixNAP Cloud Backup Standard solution, simply visit phoenixnap.com/cloud-services/backup-and-recovery or contact our sales team at 855.330.1508.
