- Lowest industry cPanel prices
- Latest Intel processors
- 15 TB bandwidth included on all servers
- Dedicated account managers

## FAST, RELIABLE, AND AFFORDABLE DEDICATED HOSTING

Deploy bare metal dedicated servers at lightning speed to support your growing business.

### ULTIMATE PERFORMANCE

Get the raw horsepower you need to deliver your applications and services to your growing customer base. Our bare metal dedicated servers offer the latest in enterprise grade hardware and technologies, and can be deployed to you within hours.

### GLOBAL REACH

Your customers are global, so your infrastructure should be too. Leverage Phoenix NAP's U.S. or European data center options to get closer to your users, and deliver the localized experience they demand. Whether you need to deploy servers in Phoenix, Ashburn, or Amsterdam, we move quickly to meet your go-to-market needs.

### YOU'RE IN CONTROL

Manage your servers like you were standing right in front of them, on the data center floor. Our customer portal automation and management tools offer you control to make changes when you need, and on-the-fly. If that is not enough, our in-house support staff is available to assist, 24x7x365.

### UNMATCHED VALUE

The 'new' economy is forcing businesses of all sizes to make smarter decisions with their money. You need highly reliable and responsive services, but at a price that supports your budget. Phoenix NAP's price/value equation does exactly that. With dedicated servers starting at \$58/mo., you have a wide range of options.

## LOCATIONS

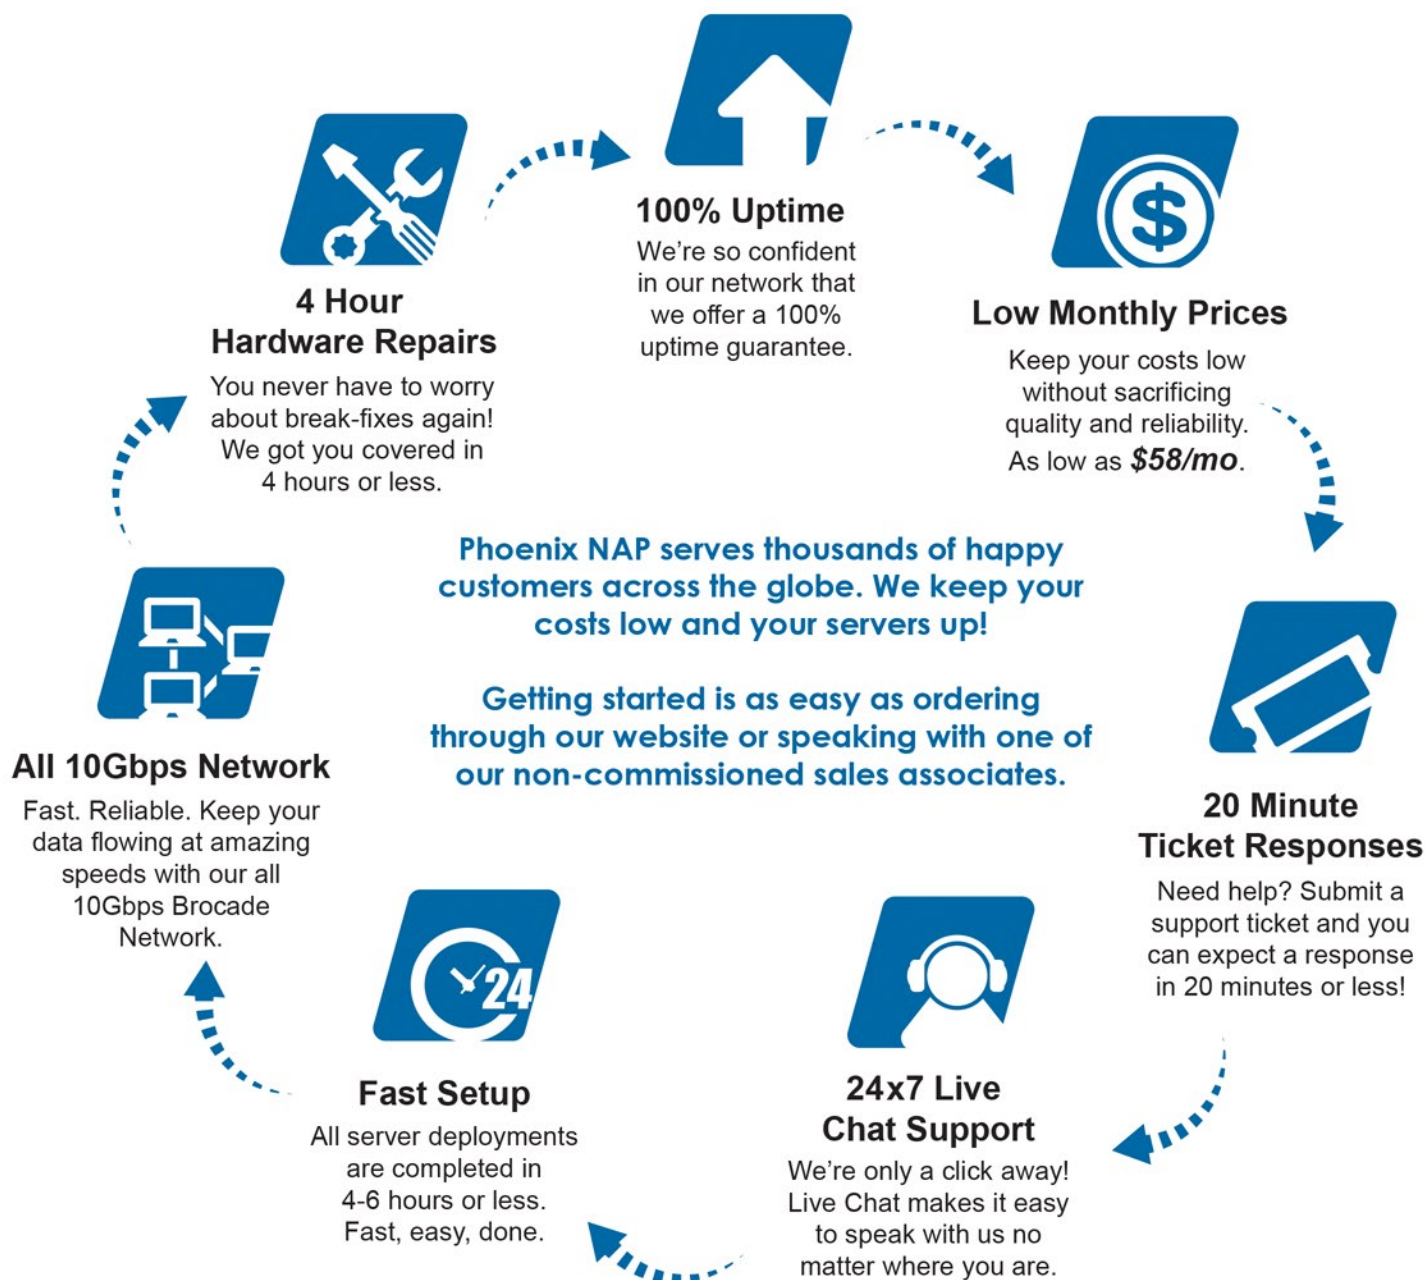

Phoenix, AZ • Ashburn, VA • Amsterdam
