OBJECT STORAGE SERVICE

Cost-Effective Object Storage, with Enterprise Performance & Scalability

Managing and accessing large sized files is made easy with phoenixNAP Object Storage service (OSS). Our OSS is designed to offer highly competitive scalability, accessibility and cost compared with Google Cloud Storage, Amazon S3, Azure and Rackspace. Get all the high level features you would expect in an enterprise object storage - without the price tag.

Self-Service Portal

PhoenixNAP OSS is complemented with a simple yet efficient interface to easily access and manage files as large as 5TB.

Geo-Diverse

Data replication between our world-class data centers ensures maximum availability is achieved and data is protected from region-specific disasters.

Pricing Options

Take advantage of flexible access charges, discounts and bandwidth costs that deliver a lower TCO.

BULK FILE & LONG TERM DATA STORAGE MADE EASY

PHOENIXNAP OSS FEATURES:

- Cross region replication
- S3 Compatible API
- Optional Encryption of objects and or buckets/folders
- High levels of data durability
- Object versioning at the per object or per bucket/folder level
- Minimal or FREE Offline Data Seeding charges
- Connect via S3 API, NFS, CIFS or other 3rd Party applications
- Support for objects up to 5TB in size

Long term storage should come with predictable costs and be structured for the purpose of usage, which is why we work closely with each client to determine the best object storage solution and help them decide on a pricing tier agreeable to their budget and needs.

Whether managing and storing HD videos adding up to the petabytes, graphic files, PDF or engineering files - get an object storage with the security, support and access you need to run your business.
