

Cloud Backup and Replication Services

Secure your data and business operations without high investment costs or lengthy timelines.

Scale Veeam powered backup and recovery solutions globally with phoenixNAP

Relying on industry-leading backup and recovery solutions by Veeam, our services are tailored to meet the demands of modern businesses and enable rapid growth of independent hosting providers. From strategic locations in the U.S., Europe and Asia, phoenixNAP provides you with opportunities to protect your data or offer data protection to your customers as a service provider! All that with minimum upfront investments and with an easy ability to grow your business, while protecting yours and your customers' businesses.

- Are you getting the most out of your Veeam Backup & Replication software?
- Does your existing DR plan meet the business recovery time objectives (RTOs)
 - Do you need to minimize potential data loss during an unplanned outage?
 - Do you currently protect your critical data off-site?
- What are your mission-critical applications and how are you protecting them today?

PhoenixNAP and Veeam are making it possible to achieve enhanced continuity with no upfront investments for end users and resellers alike.

Cloud Replication by Veeam

Protect your data and applications with fast, easy, and secure replication of virtual machines. Veeam's world class disaster recovery solution whose built-in features keep your IT assets available at any time.

Cloud Backup for Veeam

Maintain offsite copies of your backups and restore them quickly to minimize the risk of business disruption. Master the 3-2-1 backup rule without investing money and resources into a second site.

Cloud Backup for Veeam

Few things are as important to any business as its data. And backing up critical information is not only a smart business decision, it's a necessary move in today's ultra-connected environment. However, seeking out an offsite backup location can sometimes be a time-consuming and costly process.

Veeam Integrated

Fast Provisioning

Cost Effective

PhoenixNAP Cloud Backup for Veeam is designed to offer a quickly provisioned offsite backup at fractions of the cost of implementing a physical data recovery site. Using the latest Veeam® Availability Suite™ software, you can store a copy of your data in a remote, dedicated cloud repository accessed via an encrypted SSL connection and cloud gateway. Your critical data can be backed-up in four hours or less! PhoenixNAP can assist you with a solution that saves you time and money while ensuring your operationality in case of a disaster.

ADVANTAGES OF LEVERAGING THIS SOLUTION:

- Backup your virtual machines to any of our global locations
 - The ability to leverage your Veeam environment
- Quality backup services without large investments
 - Unlimited retention capabilities
- Accounts provisioned in four hours or less
- Have your local data backed up offsite in the cloud
 - Easy self-service
